## DERMATOLOGY & SKIN CANCER CENTER OF NEW MEXICO

6200 UPTOWN BLVD NE, SUITE 410 ALBUQUERQUE, NM  
 505-243-SKIN(7546) • [NMDERMCENTER.COM](http://NMDERMCENTER.COM)

Dermatology & Skin Cancer Center of New Mexico (DSCCNM) is a premier, state-of-the-art facility for dermatologic treatment, skin cancer detection and treatment, and cosmetic services. In addition to the ability to rapidly diagnose problems, the practice also has on-site surgical care for the convenience of its patients.

DSCCNM has grown immensely since its first launching in 2007, but its vision today is the same as that laid out upon its founding: To provide a steady level of access to quality care to patients with skin problems, supported and facilitated by an experienced administrative and nursing staff.

Skin cancer is the most common form of cancer in the United States, affecting

more than two million people every year. As one of the largest dermatology practices in the state, DSCCNM does its part to reduce that number while also treating a wide range of other skin disorders.

The office maintains a leading-edge laboratory and skin cancer treatment facility, as well as a variety of exceptional dermatologic services. Specialties range from micrographic skin cancer surgery (Mohs surgery), skin cancer detection and treatment, general dermatology, acne treatment, psoriasis, and treatment of other dermatologic skin disorders.

The DSCCNM team is especially proud of the great service they are able to provide their patients. They can definitively and rapidly treat non-melanoma skin cancers, such as basal cell and squamous cell

carcinoma, right at the clinic. Meanwhile, an in-practice Mohs surgeon makes use of a sophisticated tissue-preparation lab to rapidly determine clear margins, allowing patients to leave the office with peace of mind.

Remaining committed to excellence in patient care and quality of service, Dermatology and Skin Cancer Center of New Mexico features independent, board-certified dermatologists including: David Davis, M.D., M.S., FACMS, FAAD; Matthew Thompson, M.D., FAAD; Monica M. Romero, M.D., FAAD; Daniel Davis, M.D., and Michael B. Chang, M.D., FAAD., Natalie Mills, PA-C, MSPAS and Margaret "Megan" Pribyl, PA-C, MSPAS.
